

# AFTPA Member Benefit

## Treat your feet:

### Pro Support Systems Orthotics

#### AFT Pennsylvania

AFT Pennsylvania has entered into an agreement with Pro Support Systems to provide reduced rates for orthotic appliances. An orthotic is a three-layered shoe insert made to control and balance the foot while providing cushioned shock absorption. The discounted price for members (including dependents) will be \$195.00. This includes the casting. The usual price could be over \$400.00.

Once you receive the voucher certificate, your medical insurance will determine the next step.

#### **Personal Choice**

AFT members with Personal Choice will select a provider from the Pro Support Systems Network and present the voucher to receive orthotics. All providers in the Pro Support Systems Network participate in Personal Choice. The provider will perform an examination, take a cast impression and provide a prescription for

the orthotics and forward them to the PSS lab. The provider will charge Personal Choice for all applicable office visits, x-rays and surgical fees. The insured will be responsible for the co-pay on these services.

#### **Keystone**

Members enrolled in Keystone will see their provider and obtain a prescription from the Keystone Provider for the orthotic. If the provider is a member of the Pro Support Systems Network, the provider will cast and fit the orthotic. Should the doctor not be a member of the Pro Support Systems Network, the patient will select a provider from the Pro Support Systems Network, present the voucher certificate and the doctor's prescription and receive the casting and fitting at no additional charge.

#### **Medicare**

The procedures will be the same for Personal Choice. In all instances, Medicare will be the primary payer for non-orthotic services.
